At the Institute for Artificial Intelligence Research and Development of Serbia we are looking to help create the future of AI. As a senior member of our team, your job will be figuring out what we need to do to build it.

You'll be a critical member of your research team, removing barriers to your team's success, communicating progress to all stakeholders and ensuring the big picture stays in focus while delving into the details on specific technical issues in the domain of artificial intelligence. Ideal team members will have domain expertise in specific areas of AI (e.g. Computer Vision, NLU, etc.), a PhD degree and several years of research and team-supervision experience, are adaptable and resilient, eager to tackle unfamiliar situations with curiosity and tenacity, and thrive on inspiring and influencing at all levels of the organization. Publications at top AI events and in top journals are a plus.

We offer competitive salaries, flexible hours and an opportunity to be based anywhere in Serbia, as well, for exceptional candidates, anywhere in the world.

If you are interested, provide us with your CV, preferably followed with link to GitHub/Google scholar/LinkedIn or other relevant professional platform.
